

解决github频繁输入密码问题和git@github.com:Permission denied (publickey)问题

1.git每次push/pull时，当push或pull方式为http时，解决频繁输入账户名密码问题

```
git config --global credential.helper store
#最后会在这个路径下生成你git相关信息
cat ~/.git-credentials
https://zhd-haodong:密码@github.com
```

2.git当push/pull方式为ssh时,解决git@github.com:Permission denied (publickey)问题

```
#生成公钥
ssh-keygen -t rsa -C 'zhang**@**.cn'
#将公钥copy到GitHub-settings-SSH即可
cat ~/.ssh/id_rsa.pub
ssh-rsa
